Analysis Shows Maxwell Sugar Beets Have High Saccharine Content

Splendid Showing Made in plendid Showing Made in Northern New Mexico District Where Growing of Profitable Vegetables Is Assuming Important Proportions.

Maxwell, N. M., Nov. 18 .- Yester lay local beet growers received re ports from the Garden City sugar beets shipped from here in October Although the analysis was made of first dug beets, which is always low it shows that the average for the en tire tract is 18 per cent, and some went as high as 21% per cent. The average around Garden City is 16 per cent. Beets dug this month are surto go higher. Field Superintendent Nolan says he would not be surprised to find some of the beets go as high

Beet growing in this district is something new for the farmers, and quarter of a million dollars, at the their immediate success has been highly gratifying. Around Rocky Ford, where they have grown beets Presier, in place of Joe Brown, who for the past fifteen years, the average is thirteen tons per acre. The average on the Maxwell tract this year is eleven tons, some of the beets growing on land that had never been the university by a large score. More- plowed before. This showing is truly remarkable in a new field. S. H. Garretson, who raised beets in Colorade and knows how, dug eighteen tons per acre from part of his land. Other farmers on the tract can do as well or better when they understand the

This year about 300 acres of beets were grown here for the Garden City, Kan., factory, and this small acreage will bring the growers not less than \$25,000. At eleven tons per acre. beets are averaging the growers \$85,50 per acre. And there are no long waits for the money; no worry over the market. .

Farmers around Rocky Ford, Colo. are getting rich raising thirteen tons Brings you hours of misery at let- of beets per acre with an average 50 feet and two croscuts weer run 25 sugar content of 16 per cent, and they feet each way in solid copper ore and have been growing beets for the past yet no walls have been encounteerd. fifteen years. Three or four years of The Ozark company is also driving beet growing on Maxwell lands will a drift to cut the same great copper bring the average here up to fifteen body on its ground. On the strength tons or better. It is not unreasonable of this and other discoveries, it is to say that within a few years the predicted by a well known El Paso exfarmers on the Maxwell tract will be pert, who has visited this camp re-Read what an Albuquerque citizen receiving more than \$100 per acre for centl yand is very familiar with the their beets.
